

## **Sensage Wins 2008 Network Products Guide Innovation Award**

### **SenSage 4.0 Selected for Its Leadership in the Security Software Category**

SAN FRANCISCO – MAY 20, 2008 – Enterprise software leader SenSage, Inc. today announced that SenSage 4.0, the company's newest event data warehouse, has been selected as a winner of the [2008 Product Innovation Award](#) by Network Products Guide, a Silicon Valley Communications online publication.

SenSage 4.0 uniquely combines the best elements of traditional log reporting tools with event data warehouse capabilities to serve the needs of enterprises for which compliance is a strategic requirement. The software redefines how companies can benefit from event log information by making it easy for non-technical staff – such as auditors, business analysts, managers and occasional users – to conduct queries and generate customized reports. This latest release also introduces performance enhancements that lower total cost of ownership by reducing deployment time and support requirements.

“The goal of any product innovation is to drive positive change,” said Rake Narang, editor in chief, Network Products Guide. “Innovative products such as SenSage 4.0 are making it easier for corporations to confidently manage their most sensitive operations.”

Ed Chopskie, vice president of marketing for SenSage, commented, “This recognition by Network Products Guide validates our commitment to providing our customers with the solutions they need to make the best decisions for their businesses. We are proud of our aggressive investments in new software innovation, and we are honored that the hard work of our team was acknowledged with this prestigious award.”
