

**SENSAGE WINS NETWORK PRODUCTS GUIDE
2009 BEST PRODUCTS AND SERVICES AWARD**

*SenSage Event Data Warehouse Selected as a Winner
In IT Governance, Risk and Compliance Category*

SAN FRANCISCO, May 19, 2009 – Enterprise software leader SenSage, Inc. announced today that Network Products Guide, the industry’s leading publication on information technologies and solutions, has named the SenSage Event Data Warehouse a winner of the 2009 Best Products and Services Award. This respected annual award honors products and services that represent the rapidly changing needs and interests of the end users of technology worldwide. As part of the tech-industry’s leading global awards program, this year’s Best Products and Services were nominated from around the world.

“Increased end-user awareness and ongoing advances in technology are helping shape better products and services,” said Rake Narang, editor-in-chief, Network Products Guide. “The SenSage Event Data Warehouse is bringing improvements in the area of IT Governance, Risk and Compliance for an impressive array of customers.”

SenSage’s patented Event Data Warehouse lets customers easily capture, retain and query years of event data from multiple sources at any detail level to support business requirements. The company’s breakthrough technology advantage is based on the use of a columnar database across clusters of commodity servers, storage and networking to deliver pre-built, highly targeted business solutions. Businesses around the world depend on SenSage’s patented columnar database to address emerging security threats, compliance mandates and risk management initiatives at a fraction of the cost of traditional data warehouse, SIEM and log management offerings.

“This award goes to the best technology product every year, and the reader-based recognition illustrates the power and value organizations see in our Event Data Warehouse,” said Bruno Kurtic, vice president of product management at SenSage. “With SenSage, suspicious network activity from outside or inside sources is visible, customer information is safeguarded and out-of-the-box reports pass the scrutiny of internal auditors.”

About Network Products Guide Awards

Network Products Guide is a media sponsor of Interop Las Vegas and New York and Technosium Executive Forums engaging Chief Information Officers (CIOs) and Chief Information Security Officers (CISOs). As industry's leading technology research and advisory publication, it plays a vital role in keeping decision makers and end-users informed of the choices they can make in all areas of information technology. You will discover a wealth of information and tools in this guide including the best products and services, roadmaps, industry directions, technology advancements and independent product evaluations that facilitate in making the most pertinent technology decisions impacting business and personal goals. The guide follows conscientious research methodologies developed and enhanced by industry experts. To learn more, visit www.networkproductsguide.com
